PROFESSIONAL SUMMARY

A highly motivated and detail-oriented Netcentric Computing student with a strong foundation in programming, networking, and secure system development. Experienced in **developing responsive web and mobile applications, integrating APIs and cloud solutions**, with a strong interest in mobile development, web technologies, and software testing. Adaptable to diverse technical environments and committed to continuous learning. Currently seeking job opportunities in **IT, software development, or quality assurance** to further enhance technical competencies and contribute effectively in a professional setting.

EDUCATION

Universiti Teknologi MARA (UiTM)

Bachelor of Computer Science (Hons.) Netcentric Computing | Sept 2022 – Mar 2026

CGPA – 3.10

Kolej Matrikulasi Pahang (KMPh)

Life Sciences Module | July 2021 – May 2022

CGPA – 3.42

SKILLS

Programming and Technical

- Web Development: HTML, CSS, JavaScript, TypeScript, PHP
- Programming Languages: C++, Python, Java
- Database Management: MySQL

System Analysis and Design

- Entity-Relationship Diagrams (ERD)
- Sequence Diagram

Software

- Postman
- Cisco Packet Tracer
- Wireshark

Professional & Soft skills

- Stakeholder communication
- Teamwork & collaboration
- Problem-solving & analytical thinking
- Time management & attention to detail

Languages

- Malay
- English

WORK EXPERIENCES

Web Developer & IT Support Intern – Ranaco Education & Training Institute Sdn. Bhd. | Sept 2025 - Dec 2025

- Redesigned the official landing page using Next.js, TypeScript, and Tailwind CSS to enhance user interface responsiveness and brand alignment.
- Developed and maintained company's main web content via WordPress with Elementor plugin, implementing interactive features such as banner sliders, popup videos, and motion effects.
- Performed full-cycle PC maintenance, including OS formatting, driver installations (Chipset, Audio, Network), and troubleshooting software conflicts.
- Managed network and server room operations, identifying Wi-Fi connectivity issues and conducting device inspections to ensure stable office infrastructure.

KEY PROJECTS

Music Recommendation System Based on Emotion Detection using Facial Recognition (FYP) | Mar 2025 - Aug 2025

- Built a web system that recommends music based on user’s facial emotions using Google Cloud Vision API.
- Developed using Next.js, Express.js, and MySQL with RESTful API integration and Spotify Web API to fetch emotion-based music recommendations and user-related data.

Boss Vent - Anonymous Voice-to-Feedback System (Loophole Hackathon Event) | June 2025

- Built a web app using React 18, Typescript, and Vite that provides employees a safe space to express workplace frustrations and support mental well-being.
- integrated sentiment analysis and anonymous email delivery systems to facilitate real-time feedback while ensuring user privacy and data-driven insights.

Restaurant Reservation Management System | Oct 2024 - Feb 2025

- Developed a full-stack Laravel web app that streamlines restaurant operations, from chef management to reservation, supported by rigorous system modeling and architectural planning.
- Integrated geolocation API for proximity-based branch identification and Mailtrap API for real-time booking confirmations.

IJN College Management System (Web Engineering) | Mar 2024 - Aug 2024

- Documented the system requirements, use cases, and proposed solutions for a college management system.
- Created user interface mockups to illustrate navigation flow and core features.
- Designed Unified Modeling Language (UML) diagrams including use case, class, sequence, and activity diagrams to model the system.

AWARDS AND RECOGNITION

1. Dean’s List Award (October 2024 – February 2025 semester session)
